The first of these is the fact that the
 population of the United States is
 increasing at a rapid rate. This
 is due to a number of causes, the
 most important of which are the
 increase in the birth rate, the
 decrease in the death rate, and
 the immigration of people from
 foreign countries. The increase in
 the birth rate is due to a number
 of causes, the most important of
 which are the increase in the
 average number of children born
 to each woman, the decrease in
 the age at which women begin to
 bear children, and the increase in
 the number of women who are
 bearing children. The decrease in
 the death rate is due to a number
 of causes, the most important of
 which are the improvement in
 medical science, the improvement
 in sanitation, and the improvement
 in the general health of the
 population. The immigration of
 people from foreign countries is
 due to a number of causes, the
 most important of which are the
 search for better living conditions,
 the search for better economic
 opportunities, and the search for
 better political conditions.
